

Project Management Level 6 (6N4090)

This programme aims to provide learners with a skill and competency in both the theory and practice of Project Management methodologies, incorporating the elements of soft and hard skills of project management.

Throughout the course you will learn how to:

- Develop skills required to work effectively in managing projects.
- Develop project management skills, concepts, tools and techniques.
- Create and organise projects, schedule project tasks and manage project risk & communications.
- Identify and analyse elements of risk and create both risk and quality plans to set desired quality standards.
- Pinpoint problems that are likely to require change and set out action plans for this change.

Assessment:

- Portfolio/Collection of Work 70%
- Assignment 30%
