

Team Working 5N1367

This module aims to equip the learner with the relevant knowledge, skill and competence to work as an effective member of a healthcare team, operating independently while under general direction and within a range of diverse, team-oriented environments

Learners who successfully complete this course will be able to:

1. Examine the concept, features, types and impact of teamwork within diverse formal and informal structures, for organisations systems and individuals
2. Analyse the roles, responsibilities, characteristics and skills of team members within a healthcare setting
3. Analyse the elements and stages of team development
4. Summarise key opportunities and challenges of inter and intra teamwork or of multi-team environments
5. Participate in setting team objectives and subsequent evaluation, to include control mechanisms such as on-going feedback and documentation and performance measurement
6. Participate in core team-working activities, to include negotiation, problem-solving, finding solutions, decision making and conflict resolution
7. Demonstrate appropriate communications, problem-solving and negotiation techniques in a range of team-working situations and roles, to include leadership roles and giving and receiving feedback
8. Monitor personal strengths and weaknesses as a team participant, including interpersonal communication skills and problem solving skills

Enrolment criteria:

Learners should have Leaving Certificate English or equivalent. All assignments must be typed so it is advisable to have basic computer skills.
